Winooski, VT 05737

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Burlington, VT 05401

I do NOT want Comcast or any other large entity to fill seats at any hearing. I expect regulators to pay attention to such happenings and FINE these Internet giants when they are out of line. I want, expect and demand fair hearings filled with concerned citizens. I expect so much better than what I have. Do your jobs the right way the first time, so others do not have to come through and clean up the mess you've made! In other words, DO THE RIGHT THING for the people!!!

Carol Ballou

Pat Goudey O'Brien  
141 A Tamarac Street  
Warren, VT 05674

The Internet is CLEARLY a critical piece of the United States social infrastructure, serving to keep our communities functioning, much as do things like roads, water systems, telecommunications, electrical power ... you name the utilities and entities that facilitate social functioning, and you won't find much that is MORE central and intertwined than the Internet today (though we might need water a little more than the Web, to be sure). So much of our communication and education has been transferred to the 'Net that any attempts to usurp it for private control and gain MUST be seen as a betrayal of the best interests of this country. Comcast's blatant attempts to eke away at universal and egalitarian access to Internet service must not be allowed to continue. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I actually e-mailed ComCast about their blocking peer to peer communications and the sent me a reply which follows: "Dear Robert, Thank you for contacting Comcast. My name is Melissa, and I appreciate you taking the time to contact us. Thank you for writing to us in response to reports about Comcast's efforts to manage peer-to-peer traffic on our networks. First, and most importantly, you should know that Comcast does not block access to any Web site or application, including peer-to-peer services like BitTorrent. Our customers use the Internet for downloading and uploading files, watching movies and videos, streaming music, sharing digital photos, accessing numerous peer-to-peer sites, VOIP applications like

Vonage, and thousands of other applications online. We have a responsibility to provide all of our customers with a good Internet experience and we use the latest technologies to manage our network so that you can continue to enjoy these applications. Peer-to-peer activity consumes a disproportionately large amount of network resources, and therefore poses the biggest challenge to maintaining a good broadband experience for all users, including the overwhelming majority of our customers who don't use P2P applications. It is important to note, however, that we never prevent P2P activity, or block access to any P2P applications, but rather manage the network in such a way that this activity does not degrade the broadband experience for other users. Network management is absolutely essential to provide a good Internet experience for our customers. All major ISPs manage their traffic in some way and many use similar tools. Comcast believes we have a responsibility to our customers to provide this service. Network management helps us perform critical work that protects our customers from things like spam, viruses, the negative effects of network congestion, or attacks to their PCs. As threats on the Internet continue to grow, our network management tools will continue to evolve and keep pace so that we can maintain a good, reliable online experience for all of our customers. We have posted new FAQs on our Web site making clear to our customers the steps we are taking to protect the customer experience for all of our customers. You may access content related to this issue in the FAQ section of <http://www.comcast.net> If you need further assistance, please feel free to respond directly to this email. We appreciate you taking the time to contact us. Thank you for choosing Comcast. Sincerely, Melissa Comcast Customer Care Specialist" Nothing but excuses and lies!! and today they loaded the seats at the so called public hearings so that I and hundreds of others were refused entry into the hearings! Please get these companies under control and restore the Internet and Airwaves to we the Public. Thank you, Robert P. Hatch

Tophier Hunt  
3182 Middlebury College  
Middlebury, VT 05753

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Even if Comcast's previous activity were not severely damaging to the integrity and public good value of the Internet, Comcast's behaviour in bribing passers-by to sit in on their Boston hearing in order to block out genuinely interested individuals from voicing their opinion constitutes a severe breach of public trust and should be taken into account in any decision regarding Comcast's communication-restrictive, and now truly speech-restrictive, behaviour. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Kye Lippold  
161 Austin Drive #106  
Burlington, VT 05401

I find Comcast's violations of Net Neutrality through blocking peer-to-peer communications to be ill-intentioned, dangerous to free speech, and poor business practice. Comcast's network restrictions were carried out without notifying their customers, thus undermining the power of their customers to modify their service provider if they sought improved peer-to-peer service. This impedes effective market functioning by limiting consumer information. In addition, the power of an internet service provider to control content has dangerous implications, including the risks of arbitrary corporate censorship and suppression of legitimate content. The FCC must take serious and immediate action to put an abrupt end to Comcast's harmful practice of content control and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.

Todd Logan  
Ben & Jerry's  
South Burlington, VT 05452

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Shaftsbury, VT 05262

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I just

switched my email account to gmail because Comcast has not allowed me to send messages since Dec. 31, 2007. Additionally, since Jan 13, 2008 I have been unable to send or receive email, hence the new email address. They had no problem repeatedly sending trash about how to enlarge my penis but held up my subscription to Democracy Now! for three months. According to DN, Comcast considered it SPAM. Why are they permitted to decide what I can or cannot see and to permit tasteless emails about penis enlargement vs. vital news about our world is beyond my understanding. I understand the internet is unregulated. More's the pity.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The Internet allows freedom of speech to exist in its truest form and any attempt to hinder or filter that is a blatant infringement on net user's right to freedom of speech. Comcast represents everything that is wrong with big business controlling internet connections. The fact that this even happened is directly on the shoulders of the FCC and it is the responsibility of the FCC to right this wrong by punishing Comcast to the fullest extent of the law. We the people need to know we still have the power to seek justice when we have been wronged regardless of the size of a company's bank account.
